

Integrated Policy Statement

At SSG Contracts Ltd we are committed to provide safe and healthy working conditions to prevent injury and ill health whilst providing efficient and sustainable civil engineering services that consistently satisfy customer requirements and applicable legal and other compliance obligations within a framework of an integrated Quality, Health and Safety and Environmental Management System.

This is achieved through our commitment to continual improvement by setting objectives and targets to enhance the performance of our activities which is continually reviewed for effectiveness by our audit and management review processes in accordance with the strategic business direction.

Our system promotes the elimination of hazards and reduction of risk, protection of the environment and pollution prevention, waste avoidance, efficient recycling and recovery services and minimal use of natural resources through the adoption of best practice and through consultation and participation with our clients, employees, contractors, and stakeholders.
